#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Iyer, et al., U.S. Patent 6,339,228 B1.

3. Iyer discloses a test structure as claimed. See FIGS. 1-7 where Iyer discloses a test structure for determining a short circuit.

FIG.1

4. Pertaining to claim 1, Iyer teaches a test structure for determining a short circuit between trench capacitors in a memory cell array wherein the trench capacitors are arranged in matrix form, the test structure comprising:

at least one of tunnel structures (strap) **126&136** and bridge (contacts **114** & **116**) structures connecting the trench capacitors **102** of two rows of trench capacitors to one another to form trench capacitor rows (as seen in **FIG. 1**); and

a contact area **128** for contact connection provided at each end section of each of said trench capacitor rows.

5. Pertaining to claim 2, Iyer teaches the test structure according to claim 1, wherein said two rows of interconnected trench capacitors are formed within a regular trench capacitor matrix.

***Objections***

6. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to W. David Coleman whose telephone number is 571-272-1856. The examiner can normally be reached on 9:00 AM-5:00 PM.
